Ex ⇒

```
#include <iostream>
using namespace std;
```

```
{
    int main()
```

```
{
    double x = 1.2;
```

```
    int y = (int) x; // Explicit type Casting
```

```
    cout << "Value of y = " << y;
```

```
    return 0;
```

```
}
```
