a. Interest rates presented here are effective rates calculated by dividing the accrued interest flows for the months under review by the monthly averages of the corresponding outstanding amounts. For the different types of deposits, including step-up deposits, they correspond to the average conditions practiced during the

month under review by the French credit institutions on deposits of non-financial corporations and

households (including non-profit institutions serving households) residents.

Researcher's note: Deposits of non-financial corporations and households are broken down by type unknown

Regulated rates on deposits include passbooks A, blue passbooks, sustainable development passbooks,

household and NFC deposits (in %)

home savings plans, youth passbooks and people's savings passbooks
