Investment and short term borrowing requirements underpin the growth in credit to NFCs, at +6,5% year on year. Outstanding amounts and annual growth rate (not seasonally adjusted)

Monthly changes in stocks of equipment loans (seasonally adjusted flows*)

Monthly changes in stocks of treasury loans (seasonally adjusted flows *)

Seasonally adjusted monthly flows of other loans to NFC are allocated to treasury loans in proportion to the outstanding amounts.

Non-financial corporations include all companies whose main activity is the production of goods and non-
CRS. Investment credit to non-financial corporations stood at 10.4% in June, after 7.0% in May. In particular, the
All statistical time series published by the Banque de France can be accessed on [Webstat Banque de France](#)

Calculations are made with the aim to give the best possible image of the evolution of the lending activity:

- Real estate in treasury loans stands at +5.9% in June, up from +4.98% in May and +2.5% in April.

- Loans that have been securitized or sold by credit institutions are considered as remaining in their books

- Accounting changes that are not reflecting economic transactions; in particular write-offs/write-downs, are
eliminated

The impact of statistical modifications in the scope of the MFI sector (e.g. the reclassification of an entity from the non-financial corporations sector to the government sector) is also eliminated

- As FX hedges are unknown, loans in foreign currencies are however taken into account at their face value in Euros at the end of the month
