

PRESS RELEASE

Collectis Announces Upcoming Presentations at the 56th Annual Meeting of the American Society of Hematology (ASH)

Paris, November 24, 2014 - Collectis SA (Alternext: ALCLS.PA), a biopharmaceutical company focused on developing immunotherapies based on gene edited engineered CART-cells (UCART), today announced that three abstracts on the Company's CARTcell development programs were accepted for presentation at the 56th Annual Meeting and Exposition of the American Society of Hematology (ASH) in San Francisco, December 6-9, 2014.

The abstracts are listed below and available on the ASH conference website at:

<https://ash.confex.com/ash/2014/webprogram/start.html>

Poster Presentations

Title: "Multiplex Genome Editing As a Platform for "Off-the-Shelf" Adoptive CAR T-Cell Immunotherapies"

- Abstract Number: 1111
- Date: Saturday, December 6, 2014
- Presentation Time: 5:30 PM - 7:30 PM PST

Title: "Allogeneic T-Cells Targeting CD123 for Adoptive Immunotherapy of Acute Myeloid Leukemia (AML)"

- Abstract Number: 1116
- Date: Saturday, December 6, 2014
- Presentation Time: 5:30 PM - 7:30 PM PST

Title: "In Vivo Proof of Concept of Activity and Safety of UCART19, an Allogeneic 'Off-the-Shelf' Adoptive T-Cell Immunotherapy against CD19+ B-Cell Leukemias"

- Abstract Number: 4689
- Date: Monday, December 8, 2014
- Presentation Time: 6:00 PM - 8:00 PM PST

About Collectis

Collectis is a biopharmaceutical company focused on developing immunotherapies based on gene edited engineered CART-cells (UCART). The company's mission is to develop a new generation of cancer therapies based on engineered Tcells. Collectis capitalizes on its 14 years of expertise in genome engineering - based on its flagship TALEN™ products and meganucleases and pioneering electroporation PulseAgile technology - to create a new

generation of immunotherapies for treating leukemias and solid tumors. Collectis' adoptive cancer immunotherapy for chronic and acute leukemias is based on allogeneic T-cell chimeric antigen receptor (CAR) technology. CAR technologies are designed to target surface antigens expressed on cells. Using its life-science-focused, pioneering genome-engineering technologies, Collectis' goal is to create innovative products in multiple fields and with various target markets.
