SAVING ACCOUNTS: Regulated saving accounts, i.e. livrets A, livrets de développement durable, comptes d'épargne logement, livrets d'épargne populaire, and non-regulated saving accounts, i.e. livrets jeunes and Livrets ordinaires. One part of the amounts held on regulated saving accounts is transferred by deposit-taking institutions to a fund managed by the Caisse des dépôts et consignations; the other part remains in banks' balance sheets. Debt securities with maturity of up to 2 years mainly include certificates of deposit (short term paper) issued by French deposit-taking institutions and subscribed by neither MMF nor deposit-taking institutions counterparts.

Annual growth rates are adjusted for reclassifications and revaluations but not for foreign exchange rate effects.

With this publication, the method of seasonal adjustment (SA) of money aggregates has been revised, resulting in small revisions (for example, the annual growth rate of resident resources included in M1 is +8.3% in August 2021, compared to 8.6% with the old method). The changes consist in switching to the X13-ARIMA method, instead of TRAMO-SEATS, and in adjusting the sum of the twelve monthly seasonally adjusted flows of a calendar year to the annual sum of gross flows.
