## **CLOSING OF THE EUR 49.7 MILLION PRIVATE PLACEMENT EXPECTED TODAY**

**Lille (France), Boston (Massachusetts, United States), June 26, 2014** – GENFIT (Euronext: GNFT; ISIN : FR0004163111), a biopharmaceutical company at the forefront of developing therapeutic and diagnostic solutions in metabolic and inflammatory diseases, that notably affect the liver or the gastrointestinal system, announces that its EUR 49.7 million private placement announced on June 23, 2014 is expected to close today.

The capital increase was placed with international investors specializing in the sector of the company, with the majority coming from the US.

Jean-François Mouney, CEO, said: *"We are very pleased to close this oversubscribed placement, which included several leading mutual funds and specialist investors within the US and UK, significantly enhancing our shareholder base. These proceeds will solidify the position of GFT505 as we finalize our Phase 2b study and begin preparing for Phase 3 in 2015, as well our biomarker program in the indication of NASH. Our ultimate goal is to provide patients suffering from this unmet need an effective and safe treatment for this debilitating disease."*

The settlement-delivery of the new shares is expected to take place today. The new shares will be listed on Euronext Paris on the same line as Genfit's existing shares (ISIN Code FR0004163111). The new shares are fully fungible with Genfit's existing shares. As the capital increase represents less than 10% of Genfit's outstanding share capital, no prospectus has been established for the purpose of the listing of the shares on Euronext Paris.

Trout Capital, LLC acted as financial advisor to Genfit on the transaction.

**About GENFIT:**

GENFIT is a biopharmaceutical company focused on the Discovery and Development of drug candidates in fields of high medical need due to a lack of suitable treatment and an increasing number of patients worldwide. GENFIT's R&D efforts are focused on contributing to bringing new medicines to market for patients with metabolic, inflammatory, autoimmune and fibrotic diseases, that affect the liver (such as NASH - Nonalcoholic steatohepatitis) or the bowel (such as the inflammatory bowel disease). GENFIT implements mutually beneficial approaches that combine novel treatments and biomarkers; its research programs have resulted in the creation of a rich and diversified pipeline of drug candidates, including GENFIT's lead proprietary compound, GFT505, that is completing a Phase 2b study in NASH.

With facilities in Lille, France, and Boston, MA (USA), the Company has approximately 80 employees. GENFIT is a public company listed in compartment B of Euronext's regulated market in Paris (Euronext: GNFT; ISIN: FR0004163111). [www.genfit.com](http://www.genfit.com)
