Since the new IFRS came into force, the subsidiaries Sogara and Centros Comerciales Carrefour have been consolidated on an equity basis. As such, the figure for consolidated sales is that of the parent company: 278.0 million euros (+5.1%).

On the whole, business over the first half of 2010 was in line with the observations made previously, confirming the sluggish environment which is affecting household consumption.

- In France, the supermarkets and mid-size hypermarkets are holding up well, while very large stores are still being hit by the difficulties in the non-food sector.
In this way, the parent company is able to confirm its growth, buoyed by the success of the Carrefour Market network, whose deployment will be fully operational by the end of October.
The Sogara subsidiary recorded an improvement during the second quarter, but is still down, penalized by textiles in particular and growing regional competition.
- In Spain, following a first quarter characterized by a strong level of promotional activity and growth in "consumer electronics" sales, the business is being affected by the difficult economic climate, the general downturn in consumption and the persistent deflationary trends seen.
As a priority, the Group is continuing to focus on applying an aggressive pricing policy and strengthening its market shares.

Half-year earnings to be published on August 31st, 2010
