

## **Cinterion Provides High-Speed Connectivity for M2M Lone Worker Protection Device in U.S.**

Ultra slim Cinterion module is small enough for uniquely convenient wearable device

**Munich, June 7, 2012** – Cinterion, the global leader in cellular machine-to-machine (M2M) communication technology and a Gemalto (Euronext NL 0000400653 GTO) company, today announced that the advanced [PHS8 module](#) has been integrated into a leading-edge M2M lone worker protection device in the U.S., “Identicom®” by Connexion2. The next generation device uses the Cinterion module to provide high-speed and always-on wireless communications between workers, security personnel and management. The solution is used to improve the safety of hotel workers, healthcare personnel and all employees that work alone or in remote locations.

The Cinterion PHS8 is a unique two-millimeter thick module used in the Identicom device to provide simultaneous high-speed data, voice, GPS and video communications. The Identicom, about the size of a credit card, can be easily and securely worn for optimized convenience. It features an easy to activate “Red Alert” button that immediately streams audio and video to a security monitoring station for immediate help in emergencies. With GPS capabilities, the Cinterion module helps supervisors improve productivity by optimizing staff deployment as project needs fluctuate, and can verify employee location at a moment’s notice. The Cinterion module’s optimized power management eliminates the need to frequently recharge batteries, keeping employees connected even during long shifts in remote locations. The module’s flexible surface mounting also simplifies and speeds manufacturing improving total cost of ownership for integrators.

*“The high-speed, high-bandwidth performance of the Cinterion PHS8 module is certainly superior to other solutions we evaluated, and its miniature size is unique on the market in allowing us to make a discreet, easy-to-wear device,”* said Craig Swallow, Connexion2 CEO. *“We value their leading-edge products such as PHS8 and the unparalleled engineering support that helps ensure our solutions get to market faster.”*

*“With Connexion2’s Identicom lone worker device, employees no longer need to locate or fumble with a cell phone if they need help in an emergency and companies can ensure the security of their employees,”* said Norbert Muhrer, Cinterion CEO. *“Together we are leading the way by bringing dedicated lone worker protection technology to the United States and other new markets.”*

### **About Gemalto**

Gemalto (Euronext NL0000400653 GTO) is the world leader in digital security with 2011 annual revenues of €2 billion and more than 10,000 employees operating out of 74 offices and 14 Research & Development centers in 43 countries.

We are at the heart of our rapidly evolving digital society. Billions of people worldwide increasingly want the freedom to communicate, travel, shop, bank, entertain and work – anytime, everywhere – in ways that are convenient, enjoyable and secure. Gemalto delivers on their expanding needs for personal mobile services, payment security, identity protection, authenticated online services, cloud computing access, eHealthcare and eGovernment services, modern transportation solutions, M2M communication.

Gemalto develops secure software that runs on trusted devices which we design and personalize. We manage these devices, the confidential data they contain and the services they enable, throughout their life cycle. We innovate so that our clients can offer more ways of enhancing the convenience and security of their end-users' digital lives. Gemalto is thriving with the growing number of people using its software and secure devices to interact in the digital and wireless world.
