Growth over 2 years of the outstanding amounts of loans to MFIs

All statistical time series published by the Banque de France can be accessed on [Webstat Banque de France](#)

Non-financial corporations include all companies whose main activity is the production of goods and non-

Publication available under [Apple](#) and [Android](#) applications

Investment in outstanding treasury loans are close to zero as banks have extended many PGEs over one

Calculations are made with the aim to give the best possible image of the evolution of the lending activity:

- Loans that have been securitized or sold by credit institutions are considered as remaining in their books

- Accounting changes that are not reflecting economic transactions, in particular write-offs/write-downs, are

- continued growth of the real estate component (+4.7%, after +4.8% in May) and near stability of the

- The impact of statistical modifications in the scope of the MFI sector (e.g. the reclassification of an entity

from the non-financial corporations sector to the government sector) is also eliminated

- As FX hedges are unknown, loans in foreign currencies are however taken into account at their face value

in Euros at the end of the month

The two-year growth rate is the ratio of the outstanding amount in month m to the outstanding amount in month m-24. Therefore this rate is not annualized.
